

Five Important Questions about Laser Treatment

During the course of our consultations, we have noticed that many patients ask the same questions regarding laser treatment. For your convenience, we have listed the five most frequently asked and important below. We hope you find the information useful.

1. How is it decided which laser is to be used in my case?

Each patient has a personally tailored and detailed consultation session to clarify which laser is appropriate for your condition.

2. What is the earliest age at which one can undergo laser treatment?

In principle there is no age restriction. Age suitability for each individual case is clarified during our individual consultation sessions.

3. Is the laser treatment also suitable for the removal of scars?

In certain cases, laser treatment can have a positive effect on scar tissue. The success of laser treatment on scars, depends on the type of scar. Important for the success of the laser treatment, are a correct diagnosis and the preliminary consultation.

4. What happens if one accidentally looks directly into the laser with their eyes?

During the treatment the patients wear special safety glasses which protect them from the laser light and prevents them accidentally looking into the laser, which must be absolutely avoided.

5. Is the laser treatment applicable only for the face?

No, laser treatments can be used, in principle, on all body regions.
